- Multiple language software
- Regular updates (available for subscribers)

# CDPSCAN

### The hardware...

CDP (Compact Diagnostic Partner) is an affordable and easy-to-use diagnostic instrument. Together with a Pocket PC\* or PC it makes a powerful tool for the independent workshop. You can perform serial diagnose (OBD/OBDII/eOBD), read/erase fault codes and perform service reset. Live data can be read via eOBD.

The diagnostic instrument is equipped with Bluetooth®. The user can choose between USB or wireless Bluetooth® connection for the PC solution.

### Product highlights:

- Covers all common communication standards (including CAN, SAE J1850, KWP 2000 etc.)\*\*
- Auto-scan function
- Wireless Bluetooth-communication
- Upgradable firmware and software

#### Car specific diagnose (OBD)\*\*
