

CASE STUDY

Client: **S.E Davis LTD**

Location: **Redditch**

Product: **BM 20200 Mobile Brake Tester Installation**

METHODS

V-Tech were delighted to install the BM 20200 ground brake tester for S E Davis LTD.

V-Tech are installing a BM 20200 Mobile Brake Tester. Without the need for any civil work, this was a relatively straight-forward job. Once unpacked the fleet, wheels are set up, and the runners are set into place. The power is connected to the control unit, PC station with the Flex Check software loaded up which is connected to the brake tester and the tablet configured for remote testing. To manage the size and weight of some of the vehicles in the S.E Davis fleet. V-Tech have arranged a customised BM 20200 to fit the exact client needs. This particular model has upgrade heavy duty gear boxes and motors. The rollers and the test bed have been extended giving an extra meter clearance to accommodate the widest of S E Davis plant machinery. The ramps have also been widened and extra length added for ease of use. V-Tech provide a full 360° BM Brake Tester service both for domestic and commercial models.
