

CASE STUDY

Client: **Tamworth Auto Repair**

Location: **Tamworth**

Product: **BM 4010 Brake Tester Installation**

METHODS

V-Tech were delighted to install the BM 4010 inground brake tester for Tamworth Auto Repair. V-Tech installed a brand new MOT bay, BM 4010 inground brake tester. A thriving local business Tamworth Auto Repair, recently moved to a new site, giving them the space to incorporate MOT testing into their full service and repair centre set up.

The brake tester is a BM 4010 Inground Model. It is sturdy and reliable piece of equipment. The BM4010 can manage an Axle weight of up to 3½ tons making it ideal for any light vehicle test lane. The BM 4010 come with BM's Flexcheck software allowing automatic single person testing. Flexcheck also produces a database reference and full test result printouts. Once installed all the equipment is double checked by the V-Tech engineers, should any problems arise V-Tech are on hand to provide swift assistance to get the bay up and running again as soon as possible.
